"Follow the highway markings and you can't go wrong"... That's the advice the Automobile Club gives you before starting on a motor trip. You follow the well-known, well-marked roads. And you reach your destination the safest, most comfortable way

Why not follow the same rule in your shopping? Why not stick to the "highways of buying?" They have been just as carefully plotted, and are just as carefully marked as the great motor roads you've come to depend upon Marked by the trade-names of reliable, advertised products

The next time you go shopping follow these "highways" Before you start, look through the advertisements in these columns. Pick out the products you want. Notice the trade-names that identify them. And then ask for them, by name

The advertisements are sign-posts to guide you to the best and most reliable merchandise.
